

RET Learning

Practical AI skills, put to work.

Fifty-three sessions across three formats, each run on your team's own tools and approved data. Every session names its platform when one applies.

Beginner: no regular AI use assumed · **Intermediate:** works with an assistant weekly · **Advanced:** comfortable with files, projects and connectors · **Pro:** already builds prompts or agents for colleagues. Each session carries a reference, S01 to B06: quote the ones you want to cover.

01 · 25 SESSIONS

RET Spark**2 hours · up to 20 people**

A short live session to understand generative AI, avoid the common mistakes and leave with a first useful result.

02 · 22 SESSIONS

RET Lab**4 hours · 6 to 10 people**

A hands-on workshop where each participant turns one recurring task into a documented AI-assisted workflow.

03 · 6 SESSIONS

RET Bootcamp**8 hours · 6 to 8 people**

A full-day track where future AI reference users build a working project and demonstrate it to the group.

RUNS ON

 ChatGPT Copilot Claude Gemini

In-house LLMs

2 hours

Up to 20 people

On site or remote

You watch it done live, and try it once.

S01 Identify where AI saves time in your team's week

A guided tour of the strongest office use cases, demonstrated live on the kind of work your team does. Leave with: a shortlist of quick wins for your team.

All platforms

Beginner

S02 Write effective prompts for everyday office work

Role, context, format and examples: a repeatable briefing method applied to the group's own tasks. Leave with: a one-page briefing pattern.

All platforms

Beginner

S03 Draft reports, emails and offers from rough notes

Rough notes turned into usable first drafts, live, on your own document types. Leave with: a drafting template per document type.

All platforms

Beginner

S04 Manage small to large projects with ChatGPT Work and Projects

Set up Projects for recurring work, then hand a whole project to ChatGPT Work and review the finished deliverables. Leave with: one project space set up on a live dossier.

ChatGPT

Beginner

S05 Maintain your professional inbox with Copilot in Outlook and Teams

Draft replies, summarise long threads and reason across your whole inbox and calendar. Leave with: a daily inbox routine you keep.

Copilot

Beginner

S06 Work faster in Gmail, Docs and Meet with Gemini

Drafting in your own style, thread summaries, and meeting notes with action items taken for you. Leave with: three routines set up in your own Workspace.

Gemini

Beginner

S07 Analyse contracts and long documents with Claude

Read a contract, a report and a policy side by side, and turn the answers into reusable documents with Artifacts. Leave with: a review brief for your document types.

Claude

Beginner

S08 Produce meeting minutes and action lists from a recording

From transcript or notes to minutes, decisions and owners, with a review pass before they go out. Leave with: a minutes template your team adopts.

All platforms

Intermediate

S09 Summarise long reports and tenders without losing the numbers

Extraction prompts, cross-checks and a one-page brief format for hundred-page material. Leave with: the brief format, ready to reuse.

All platforms

Intermediate

S10 Translate and localise business documents

Tone-true translation across French, Dutch and English. Leave with: a translation checklist for client-bound text.

All platforms

Intermediate

S11 Capture your day with ChatGPT Voice, Record and Canvas

Speak instead of type, record whole meetings on the desktop app, and get structured summaries saved as canvases. Leave with: recording set up on your own machine.

ChatGPT

Intermediate

S12 Run better meetings with Copilot recap and the Facilitator agent

Live notes, agendas and follow-ups taken by the Facilitator, and intelligent recaps for the meetings you skip. Leave with: the recap routine configured.

Copilot

Intermediate

S13 Put Claude inside Excel, PowerPoint and Word

The Office add-ins read whole workbooks, explain formulas with cell-level citations, and edit without breaking links. Leave with: the add-ins working on one of your files.

Claude

Intermediate

S14 Research your own sources with Gemini Notebook

Ground a notebook in your files, generate briefings and audio overviews, and keep every answer cited. Leave with: a first notebook built on your documents.

Gemini

Intermediate

S15 Get cited answers from your company knowledge in ChatGPT

Connect Drive, SharePoint, Slack and mail, then ask questions that answer with sources and respect access rights. Leave with: a connector plan for your stack.

ChatGPT

Intermediate

S16 Verify AI output before it reaches a client

Why models invent citations and numbers, and the three-step check that catches most of it. Leave with: the check written up as a house rule.

All platforms

Advanced

S17 Choose the right tool per task: ChatGPT, Claude, Gemini, Copilot

The same five office tasks run on all four tools live, with a scorecard the team keeps.

All platforms

Advanced

S18 Delegate finished work to background AI agents

ChatGPT Work, the two Coworks and Gemini Spark demonstrated live: what agents finish alone, and what it costs. Leave with: a delegation shortlist for your tasks.

All platforms

Advanced

S19 Hand your desk work to Claude Cowork

File access, multi-step execution and scheduled tasks: receipts to spreadsheets, folders organised, drafts assembled. Leave with: one task set up to run.

Claude

Advanced

S20 Let Copilot build the file: Agent Mode in Word, Excel and PowerPoint

Delegate whole deliverables: Copilot plans, executes and explains multi-step edits directly in the file. Leave with: two agent-mode recipes for your files.

Copilot

Advanced

S21 Automate cross-app routines with Google Workspace Studio

Describe a workflow in plain English and watch Studio build the agent that runs it, no code involved. Leave with: one routine mapped and ready to build.

Gemini

Advanced

S22 Push the models: patterns for complex work

Long documents, messy inputs, multi-step deliverables: briefing patterns for work one prompt cannot do. Leave with: the patterns as a crib sheet.

All platforms

Pro

S23 Build the business case: licences, credits and time saved

A leadership session on licence costs, metered agent credits and the metrics that prove adoption. Leave with: a cost model for your own stack.

All platforms

Pro

S24 Pick the right model and effort level, per task

Fast modes, deep reasoning and effort levels on each platform's current models, matched to daily tasks. Leave with: a picker card per platform.

All platforms

Pro

S25 Automate your personal routine: memory, tasks and triggers

Memory tuned, recurring tasks scheduled and triggers set, so the assistant works before you ask. Leave with: two automations running.

All platforms

Pro

Co-created session: a topic shaped with your team

Scoped on the call

4 hours

6 to 10 people

Workshop

You leave with one working artefact.

L01 Build your team's prompt library for recurring tasks

The ten most frequent tasks scripted into tested, shared prompts, proofed on real cases in session. Leave with: the library, versioned and shared.

All platforms

Beginner

L02 Standardise one recurring document, from brief to final version

Pick your document type and leave with a brief-to-draft-to-review workflow and its templates.

All platforms

Beginner

L03 Run your meetings end to end with AI: agenda, minutes, follow-up

One meeting type wired end to end: preparation prompt, capture routine, minutes template, action tracking.

All platforms

Intermediate

L04 Build a custom GPT for one team task

Instructions, knowledge files, actions and guardrails: one working GPT per participant, tested by a colleague.

ChatGPT

Intermediate

L05 Analyse your business data with Copilot in Excel

A messy export cleaned and analysed in agent mode, with Copilot formulas and Python in Excel. Leave with: a documented, repeatable analysis.

Copilot

Intermediate

L06 Build a Claude Project that answers from your documents

Project knowledge, instructions and Artifacts set up on your own corpus, with source checking built in. Leave with: a project your team can query.

Claude

Intermediate

L07 Turn Gemini Notebook into your project's knowledge base

Load one project's documents, get grounded answers, and produce briefing docs and an audio overview. Leave with: the notebook, live and shared.

Gemini

Intermediate

L08 Design professional decks and one-pagers with Claude Design

Turn an outline and raw material into an on-brand draft deck in your own design system, ready for review.

Claude

Intermediate

L09 Automate your weekly reporting with scheduled prompts

Recurring briefs set up in session: ChatGPT scheduled tasks and Copilot scheduled prompts, posted where you work.

ChatGPT

Copilot

Intermediate

L10 Build a proposal workflow: from opportunity brief to draft

A live opportunity taken from brief to tailored draft, with your references and case studies wired in. Leave with: a proposal workflow the team reuses.

All platforms

Intermediate

L11 Produce a month of on-brand content in one session

Your tone of voice encoded, then a month's calendar drafted: posts, newsletter and visual briefs. Leave with: the tone guide and the calendar.

All platforms

Intermediate

L12 Rebuild your recruitment pipeline with AI

Job post, screening grid and structured interview questions built for one open role. Leave with: the full kit for your next vacancy.

All platforms

Intermediate

L13 Build your monthly reporting pack with AI

One close cycle rebuilt: variance analysis, commentary and the board one-pager. Leave with: the pack, repeatable every month.

All platforms

Intermediate

L14 Document your processes into living SOPs

Three undocumented processes captured into standard procedures through AI interviews and drafts. Leave with: three SOPs and the method.

All platforms

Intermediate

L15 Build your answer library from support tickets

Your ticket history mined for the top questions, answers drafted in your tone and organised for reuse. Leave with: a first answer library, live.

All platforms

Intermediate

L16 Automate project reporting: from raw updates to steering pack

Team updates and tickets turned into status, risks and a steering-ready pack. Leave with: the reporting workflow, documented.

All platforms

Intermediate

L17 Turn one training into a full learning kit

One existing course converted: refreshed slides, a quiz pack, summaries and a follow-up sequence. Leave with: the kit, ready to run.

All platforms

Intermediate

L18 Rebuild one business process with AI inside

A recurring process mapped step by step, the AI-able steps rebuilt, and the handoffs documented.

All platforms

Advanced

L19 Analyse a dataset without a data team

One of your datasets explored in session: cleaning, pivots, findings. Leave with: a documented, repeatable analysis script.

All platforms

Advanced

L20 Build a contract review workflow with AI

Your standard contract types mapped to review checklists, clause comparisons and risk summaries. Leave with: a review workflow your specialists keep.

All platforms

Advanced

L21 Build your personal briefing system

Inbox, meetings and reading distilled into a daily brief and a decision log, set up on your own stack. Leave with: the system running.

All platforms

Advanced

L22 Delegate a multi-step task to an agent, with checkpoints

Hand one of your tasks to an agent: task briefs, checkpoint design and review discipline. Leave with: a delegation brief built for reuse.

All platforms

Pro

Co-created workshop: a workflow shaped around your process

Scoped on the call

8 hours

6 to 8 people

Project-based

Your team leaves with a running pilot.

B01 The team AI day: from first wins to daily routine

Morning: the essentials, practiced on live work. Afternoon: each participant builds one personal workflow. Capstone: every workflow demonstrated to the group, ready for Monday.

All platforms

Beginner

B02 The department day: your team's work, rebuilt with AI

Morning: your department's week mapped, from sales to customer service. Afternoon: the top tasks rebuilt with AI on your templates. Capstone: one working routine per participant.

All platforms

Intermediate

B03 The delivery day: project managers and business analysts

Morning: plans, status reports and risk logs rebuilt as workflows. Afternoon: requirements and process maps from stakeholder notes. Capstone: one artefact shipped per participant.

All platforms

Intermediate

B04 The pilot day: ChatGPT, Copilot, Claude or Gemini for your team

Morning: your chosen platform set up, with shared workspaces and house conventions. Afternoon: each participant builds a capstone use case. Capstone: the pilot demonstrated, adoption agreed.

All platforms

Advanced

B05 The automation day: processes, assistants and background agents

Morning: one process automated under supervision. Afternoon: an internal assistant built and tested. Capstone: background agents deployed, with monitoring and a handover.

All platforms

Advanced

B06 The champions day: train the people who will train the others

Morning: standards and coaching routines drafted. Afternoon: each champion rehearses teaching one session. Capstone: an adoption plan with metrics, owned by the champions.

Co-created track: a programme shaped around your roles

Scoped on the call

01 · DISCOVER

Co-creation workshop

Mapping the needs, processes and constraints specific to your team, into work streams ranked by impact and effort.

02 · FRAME

Agenda and mandate

One short executable plan: objectives, scope, milestones and success criteria, and it stays yours either way.

03 · DELIVER

Delivery

The chosen format runs on your own tools and approved data, closed by a final review against the criteria.

English or French

EN · FR

Slides, exercises and delivery follow the language the team works in.

On site or remote

BELGIUM

The same exercises either way, at your offices or over video.

Your own AI stack

NO INSTALL

Running on the licences your organisation already holds.

Follow-up by email

30 DAYS

Questions answered after RET Lab and RET Bootcamp.

Attendance certificate

PER PARTICIPANT

Issued to everyone who completes the session.

One trainer

SOLE TRAINER

Sessions are designed and delivered by me, not subcontracted.

Every session is designed and delivered by Redha Etbaz, independent product owner and business analyst since 2018: five sectors, from pharmaceuticals to international rail, and one product shipped to the App Store. PSPO I & II · PSM I · SAFe POPM · Google UX · ITIL.

Sales

Proposals from rough notes, a shared prompt library, reporting that writes itself.

S03 · L01 · L10 · B02

Marketing

On-brand content at volume, decks from outlines, campaign reporting.

S02 · L08 · L11 · B02

HR & internal comms

Job posts, announcements and policies, drafted and translated in your tone.

S10 · L02 · L12 · B02

Finance

Reports digested without losing the numbers, analysis without a data team.

S09 · L05 · L13 · B02

Operations

Procedures, planning and one recurring process taken to supervised automation.

S21 · L14 · L18 · B05

Customer service

Faster replies in your tone, a reusable answer library from your own docs.

S05 · L06 · L15 · B02

Legal & procurement

Contracts and long documents read side by side, with verification that holds.

S07 · S16 · L20

Project delivery

Plans, requirements and process maps for project managers and analysts.

S08 · L03 · L16 · B03

Learning & development

Documentation turned into training media, champions who train the others.

S14 · L07 · L17 · B06

Executive

Read less, decide faster, and know what adoption really costs.
